Noted: in this tp12, I only done with API. Sorry teacher, I will implement it later.

CRUD for price

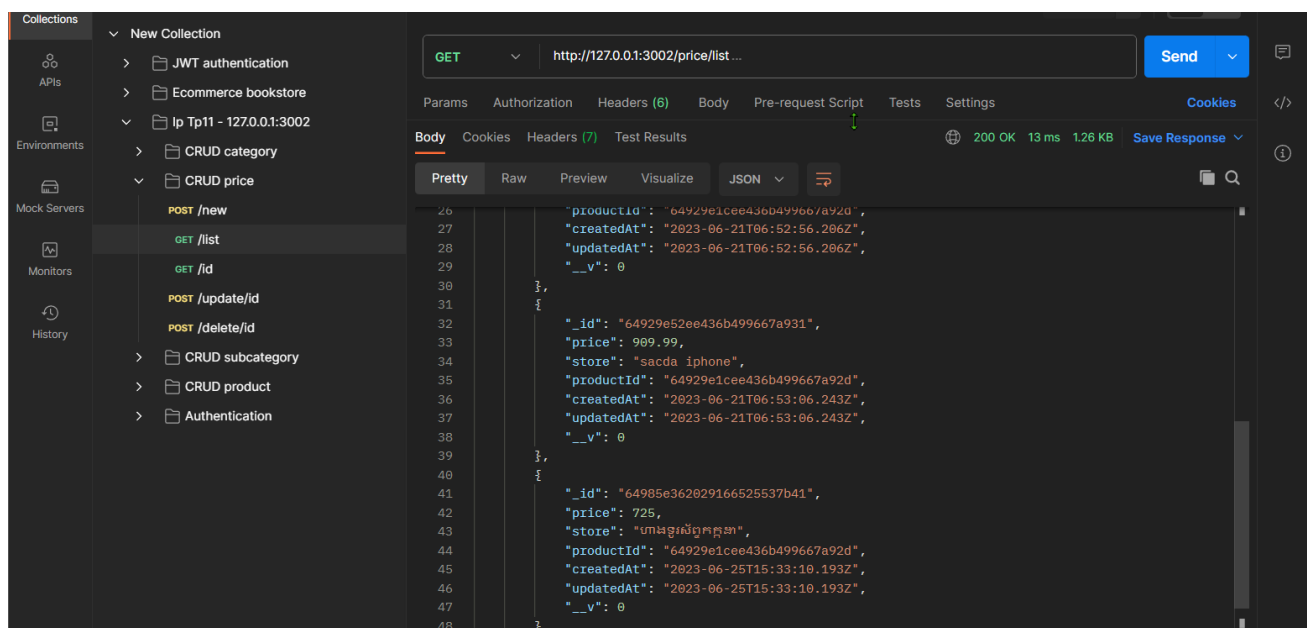

- Create

Add new price for a product.

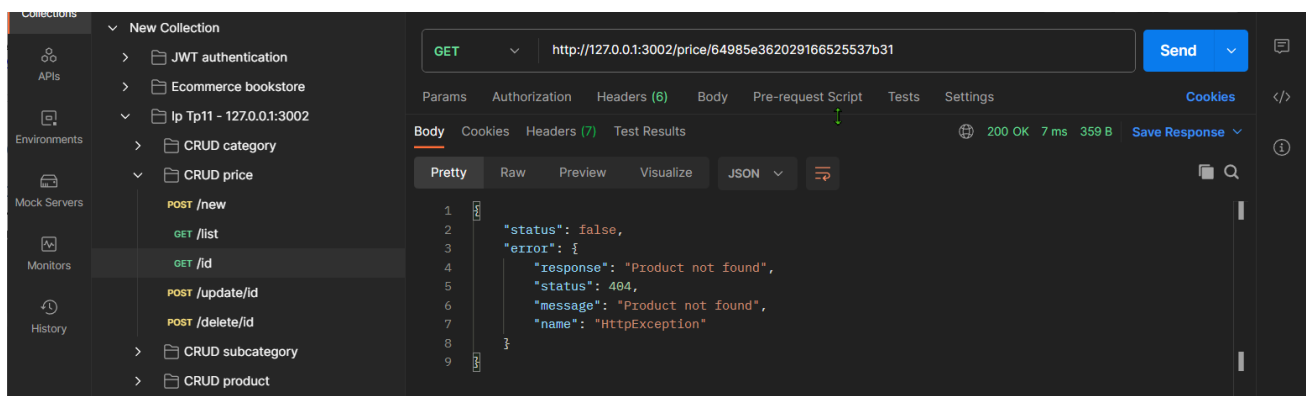

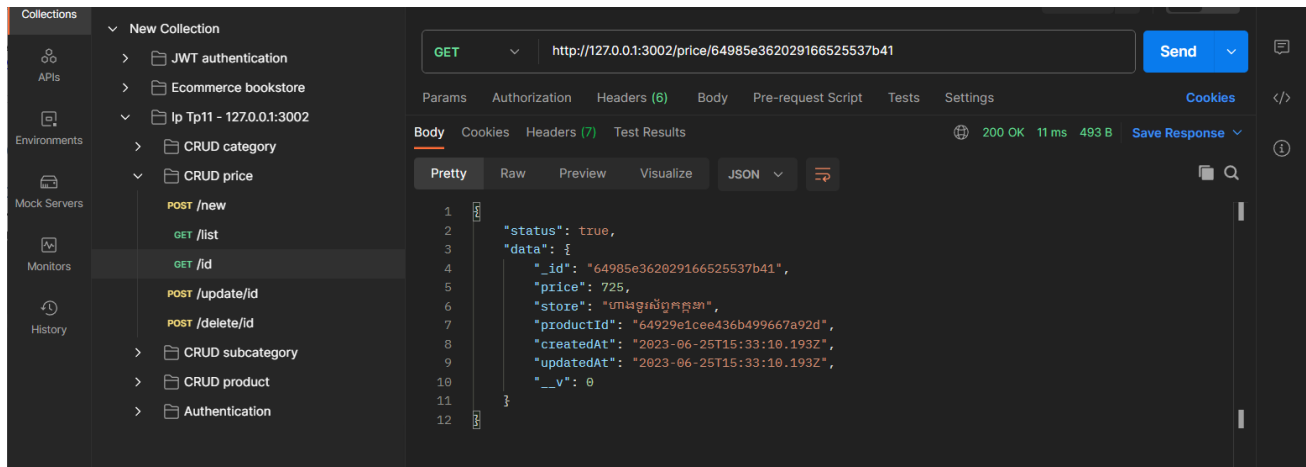

- List

List all the prices that has recorded in the DB.

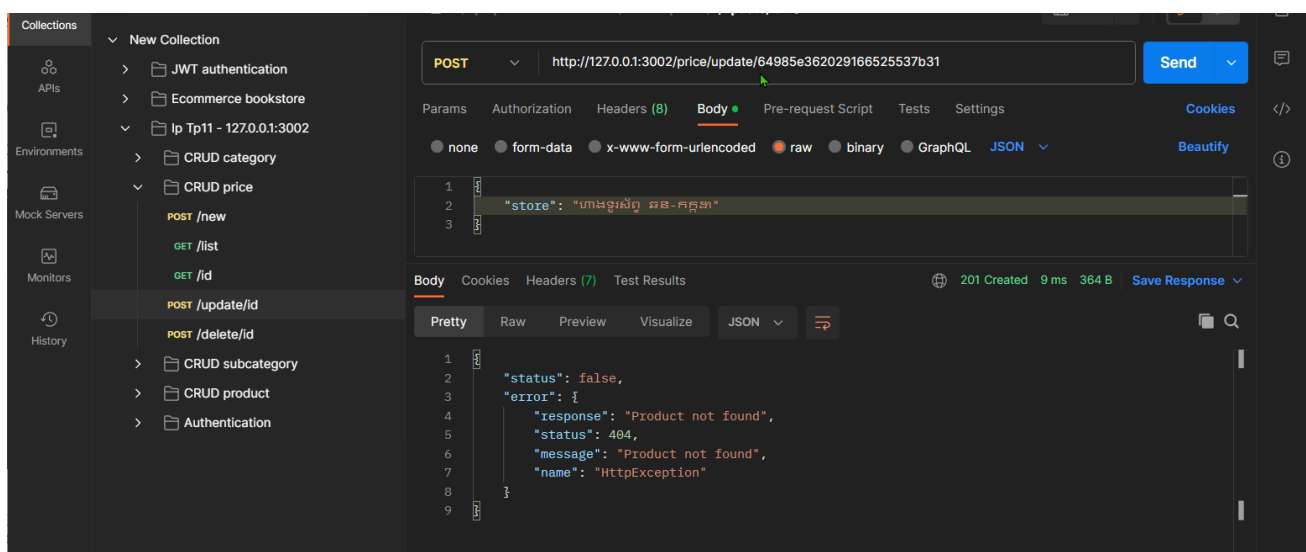

- Get by Id

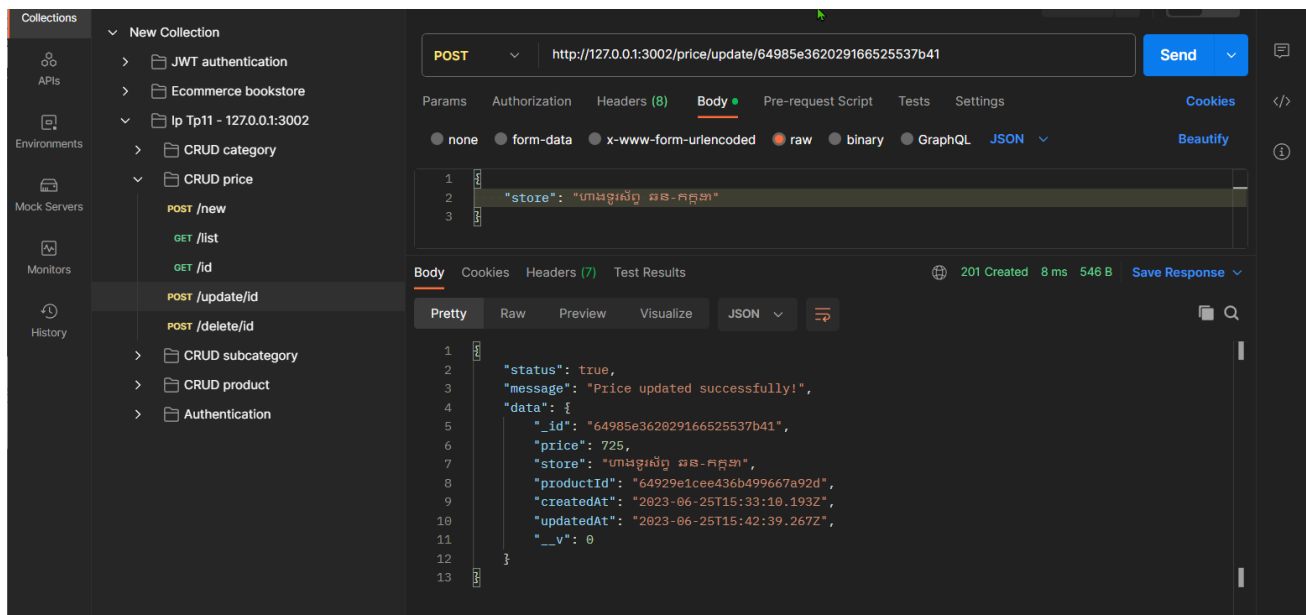

Get the price by its ID.

- Edit or Update

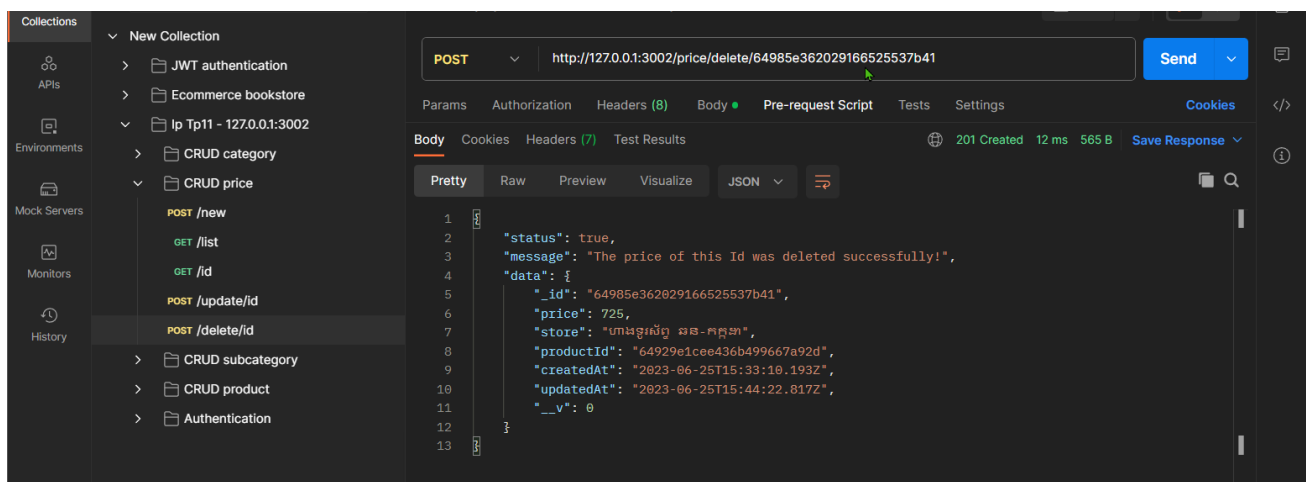

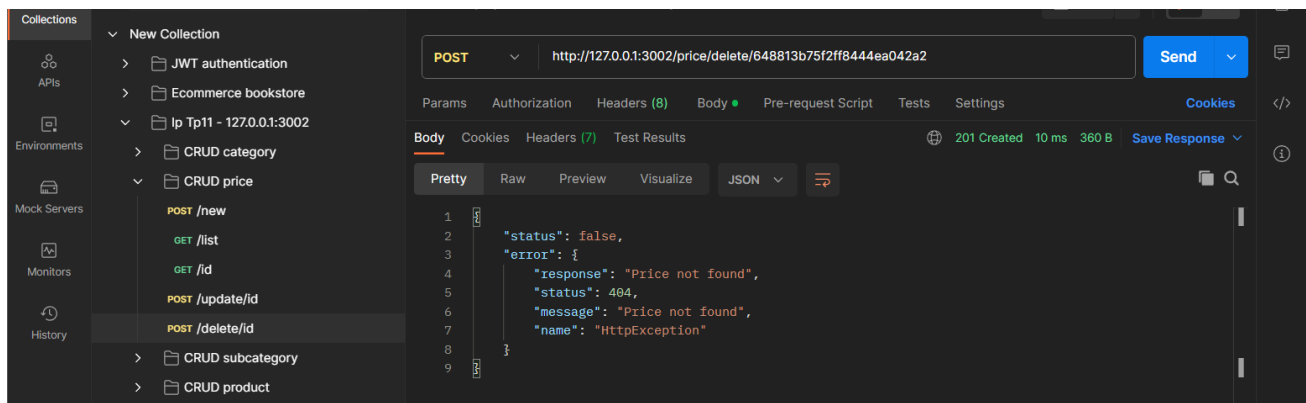

Edit a price by its ID. You can update any field you want.

- Delete

Delete the price by its ID. If the ID you put cannot find the DB, it will send the not found data for you.

- Get all price of a product

You can find all the prices of a product by input the productId.
