The code of these APIs located in:

<https://github.com/ChhornKakada/IntenetProgramming/blob/tp10/auth/routes/auth.js>

/me

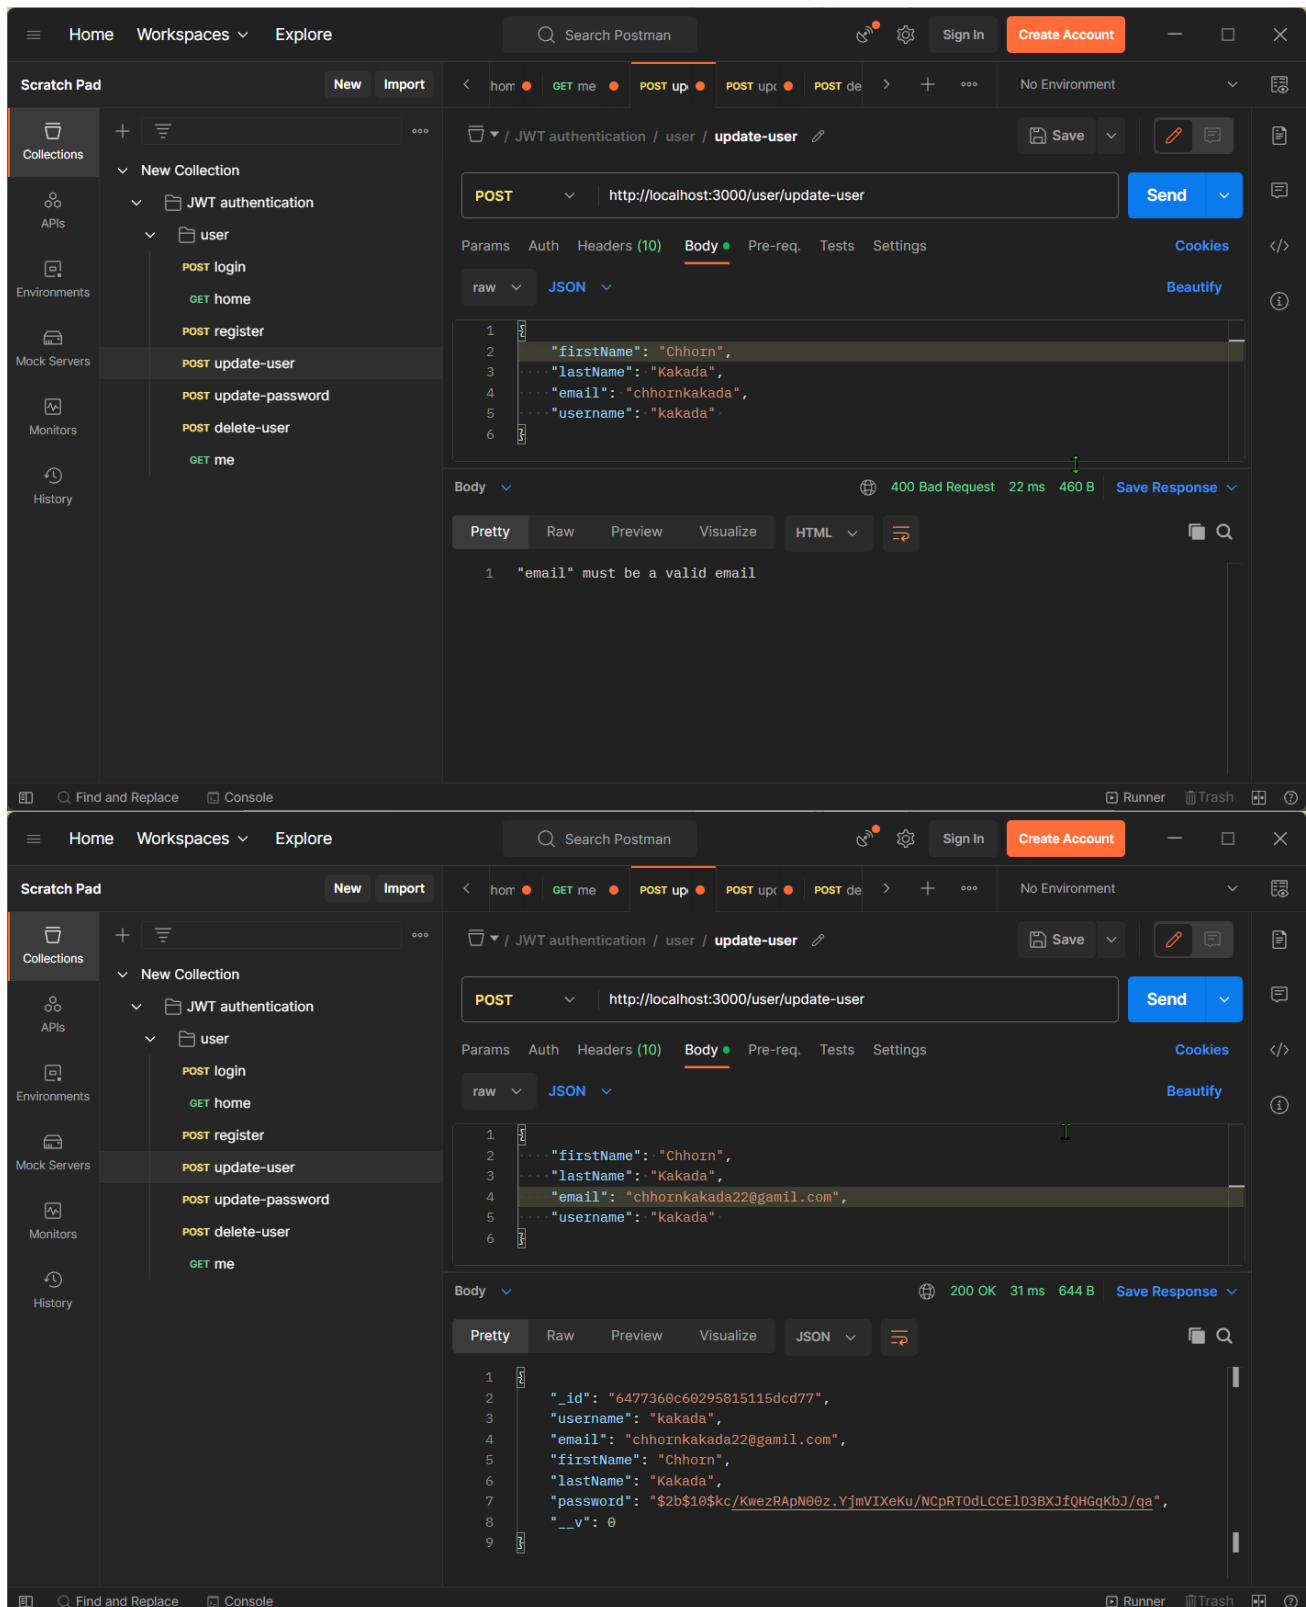

Before we can access to the auth, we need to verify with token.

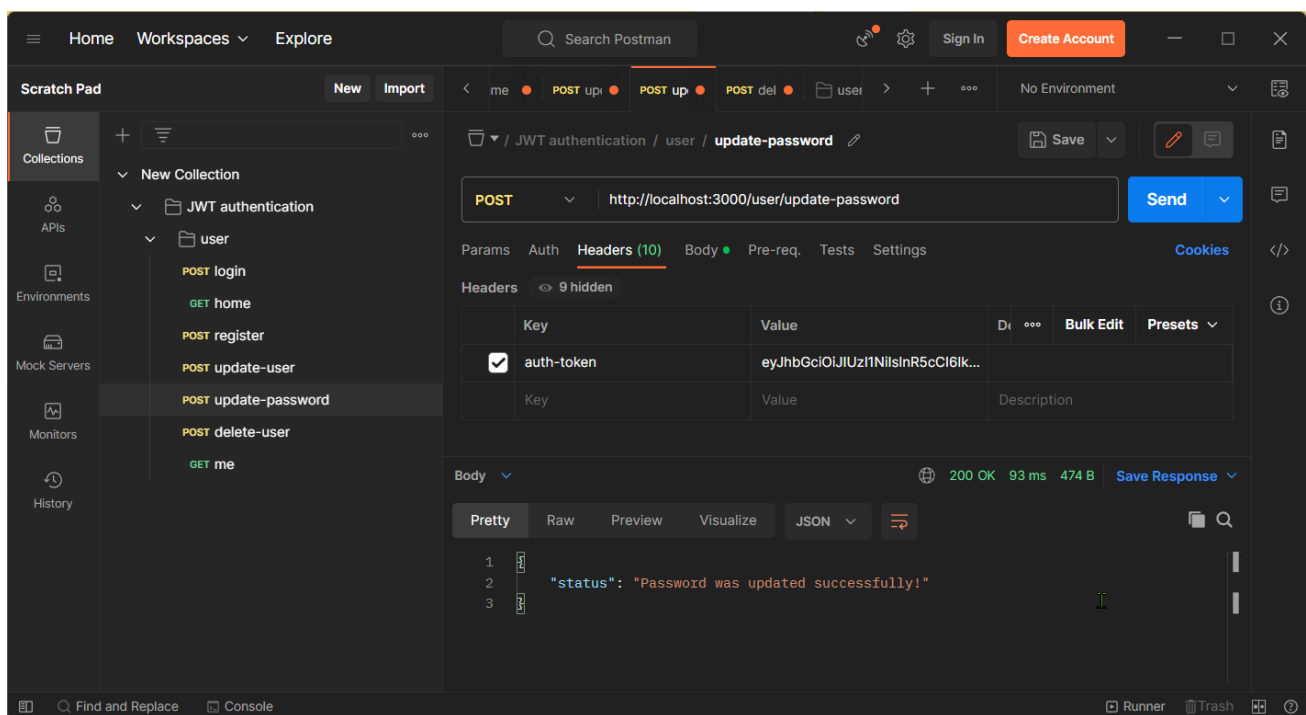

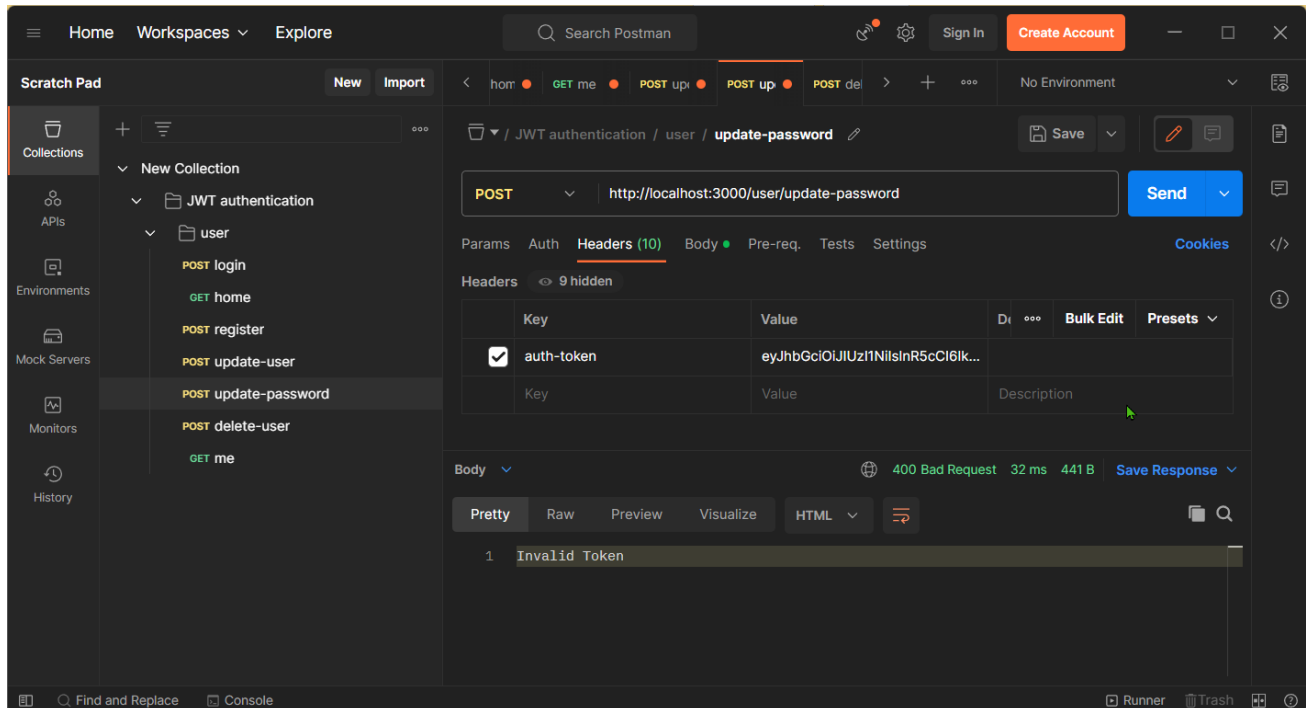

/update-user

When the user wants to update their personal info, they need to be sure that the data is accepted.

/update-password

When the password is successfully updated, it will return the result "Password is updated successfully!"

/delete-user

The user can delete another user by this endpoint.
