TP07.1: Auth screens in VueJS

Login Page

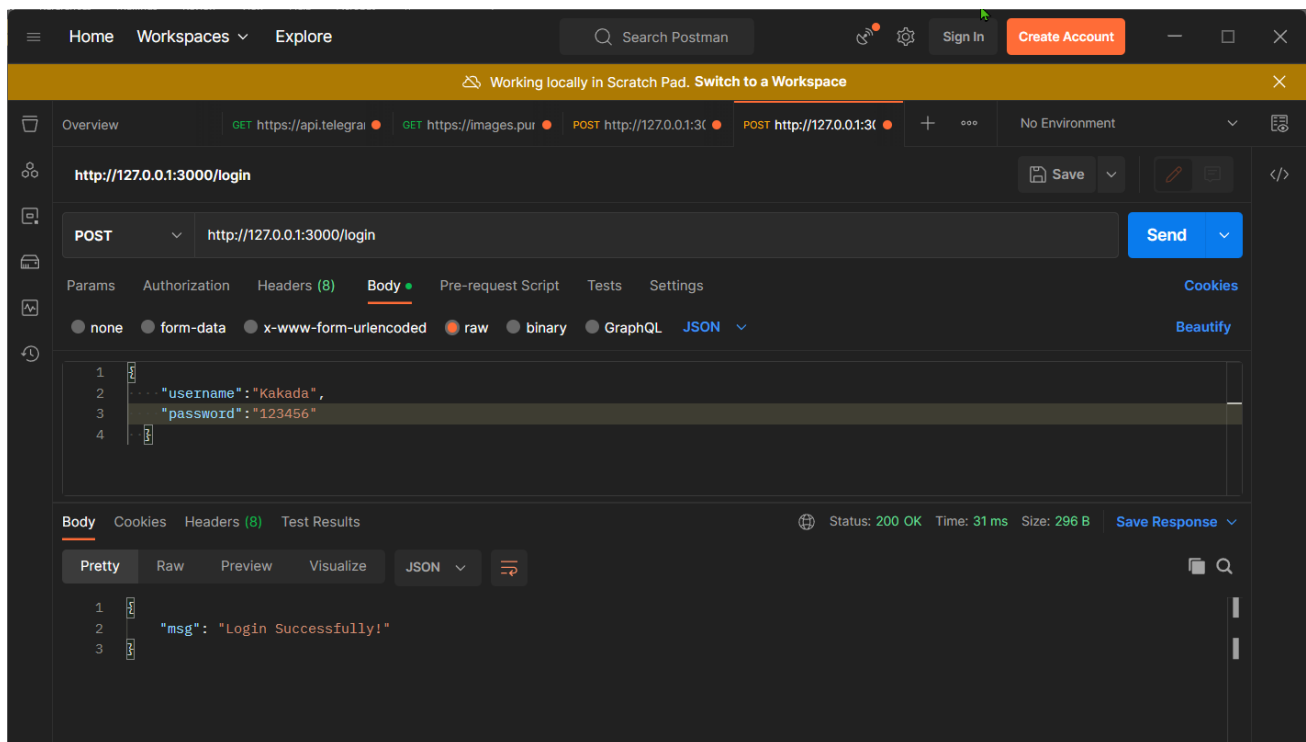

Register Page

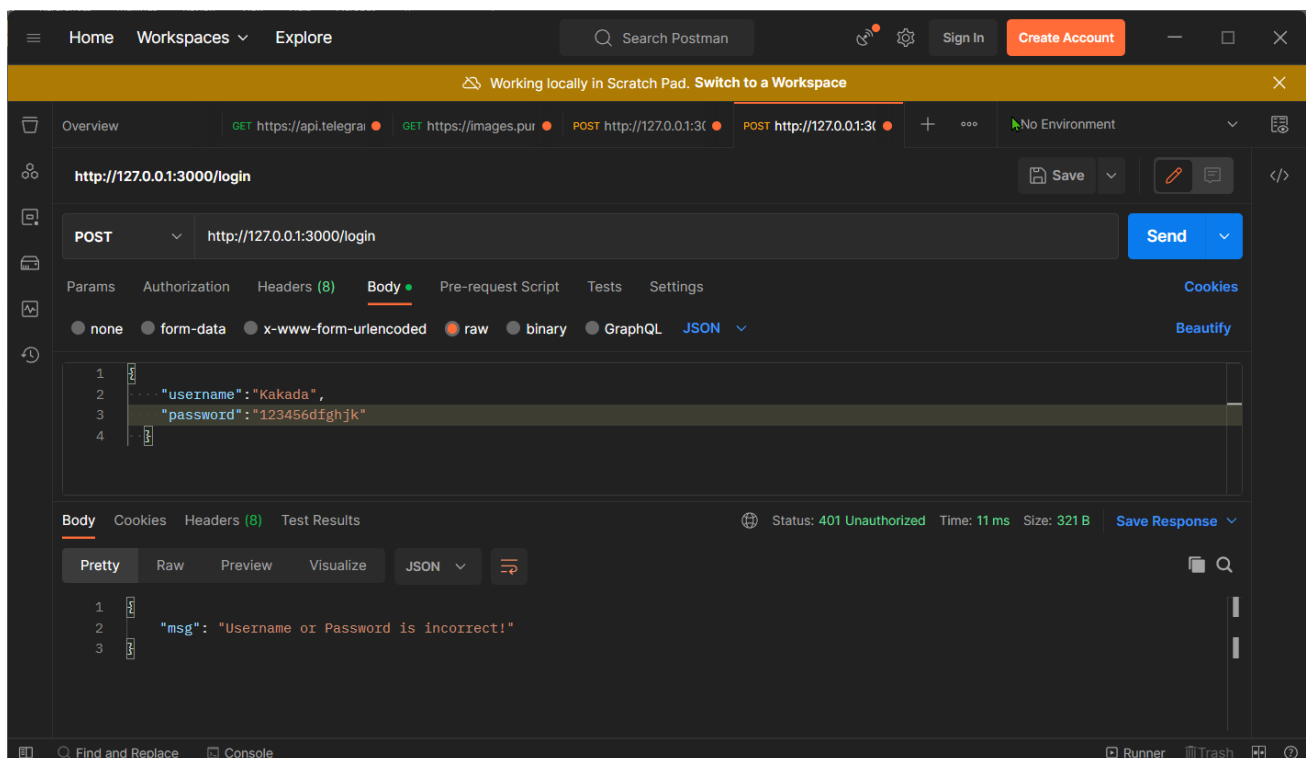

TP07.2: NodeJS with ExpressJS

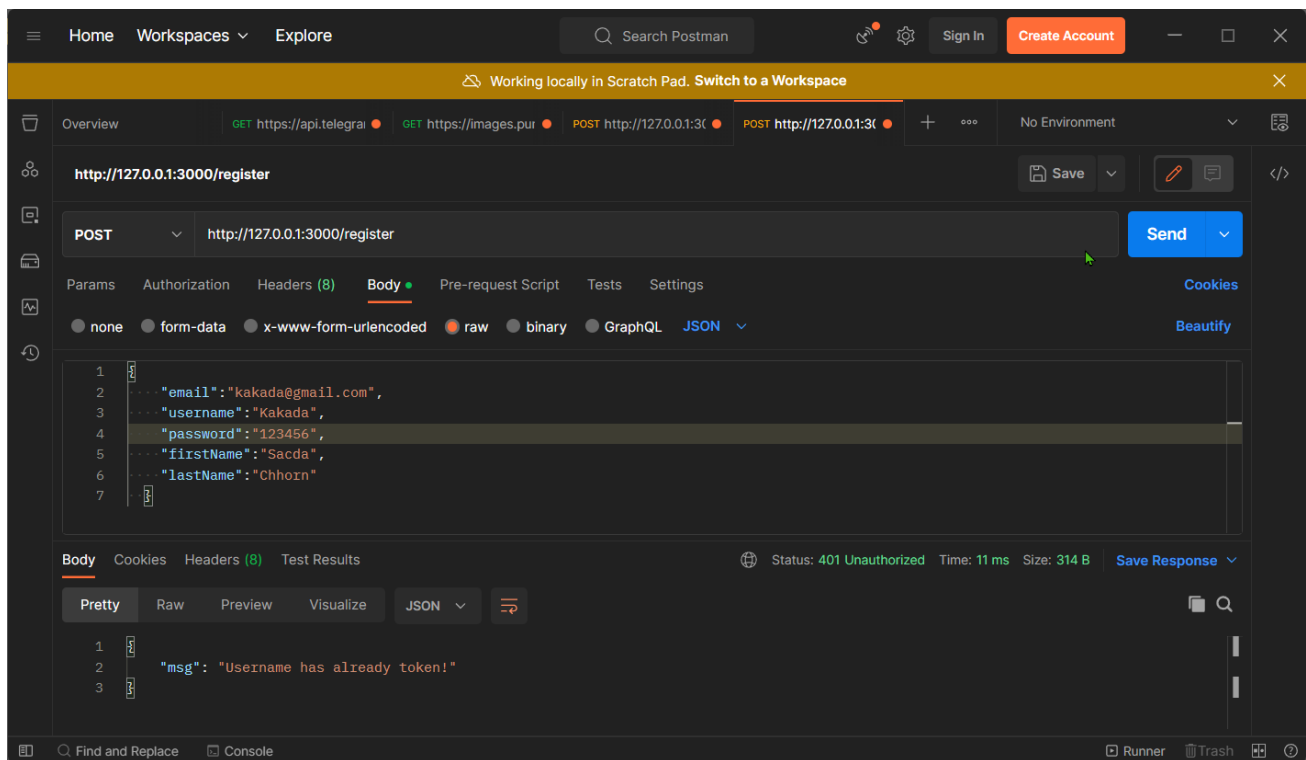

Login Successfully.

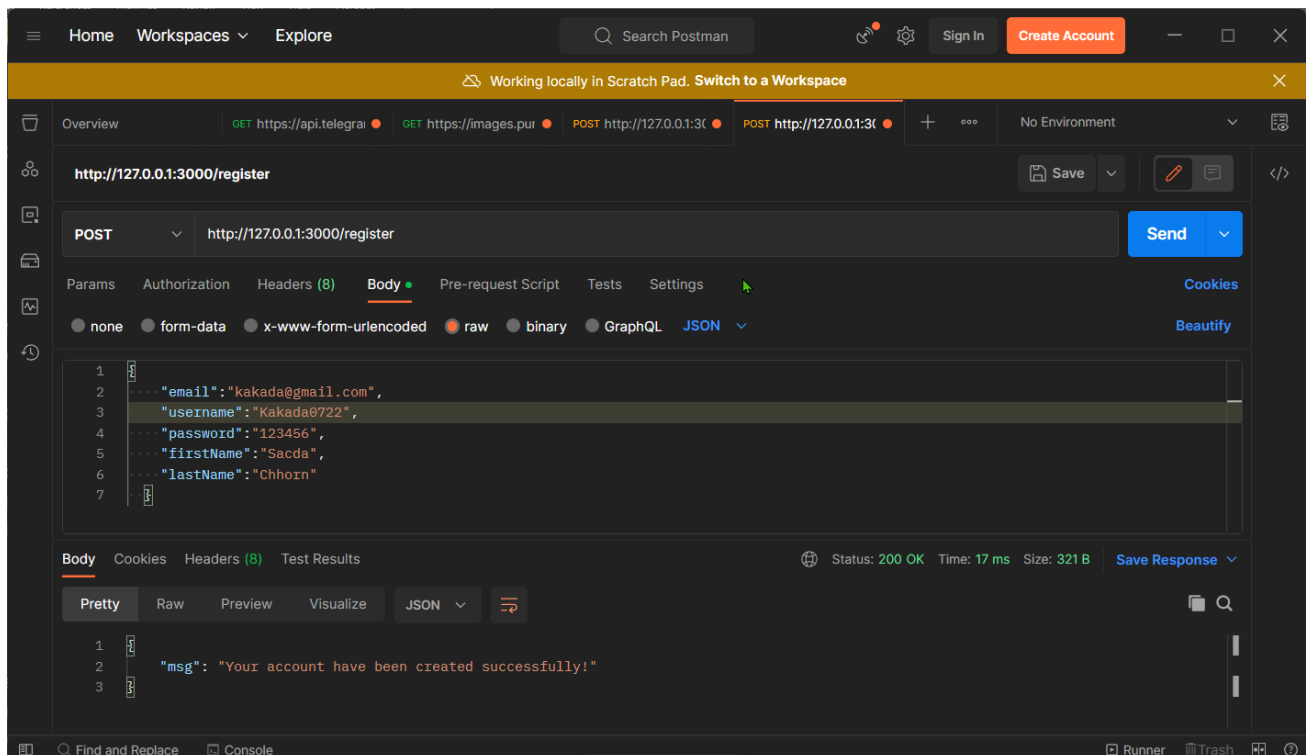

Username or Password is incorrect!

Username has already token while sign up account.

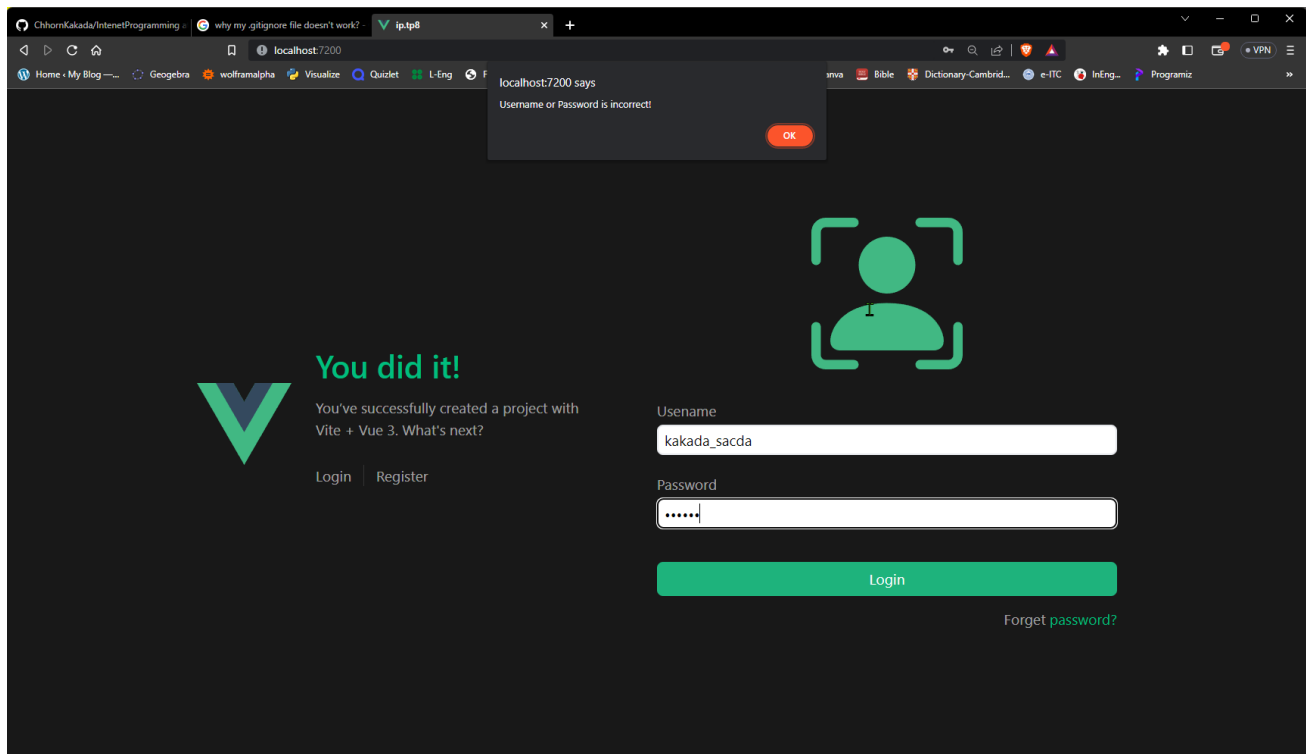

Sign Up successfully!

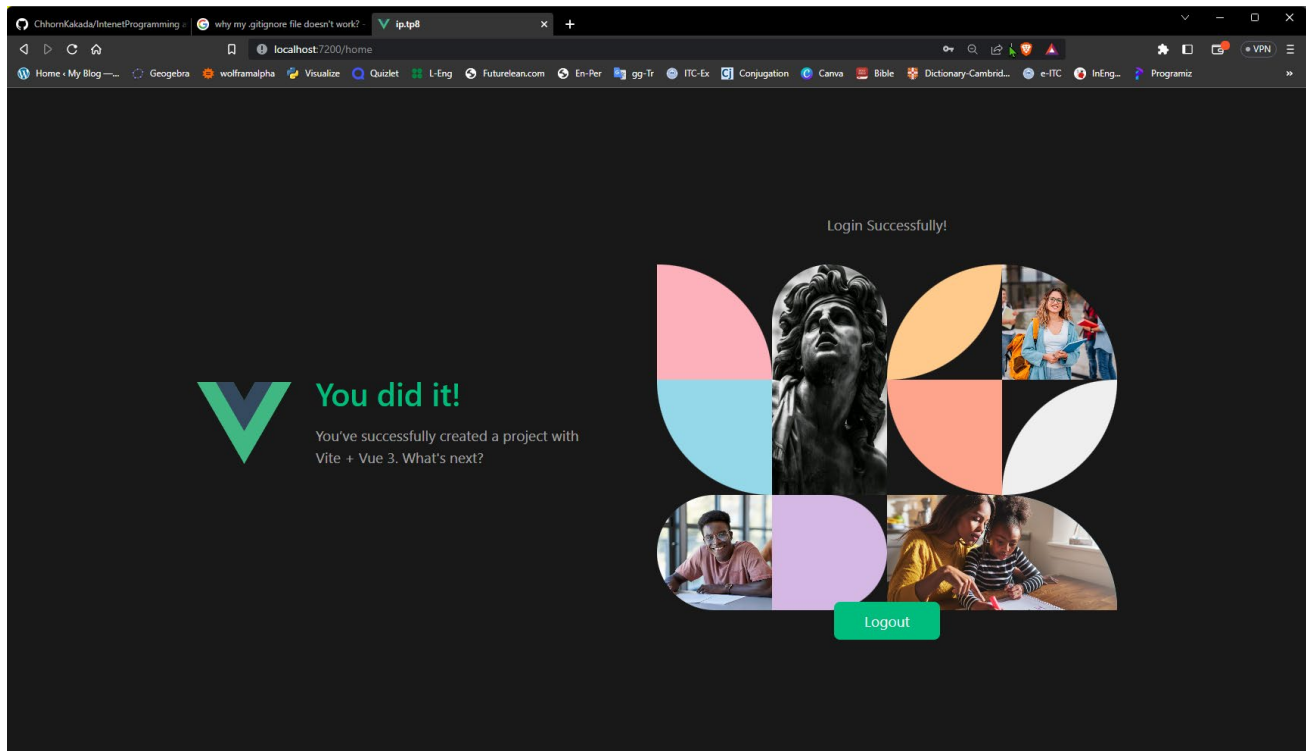

TP07.3: UI and APIs Integration

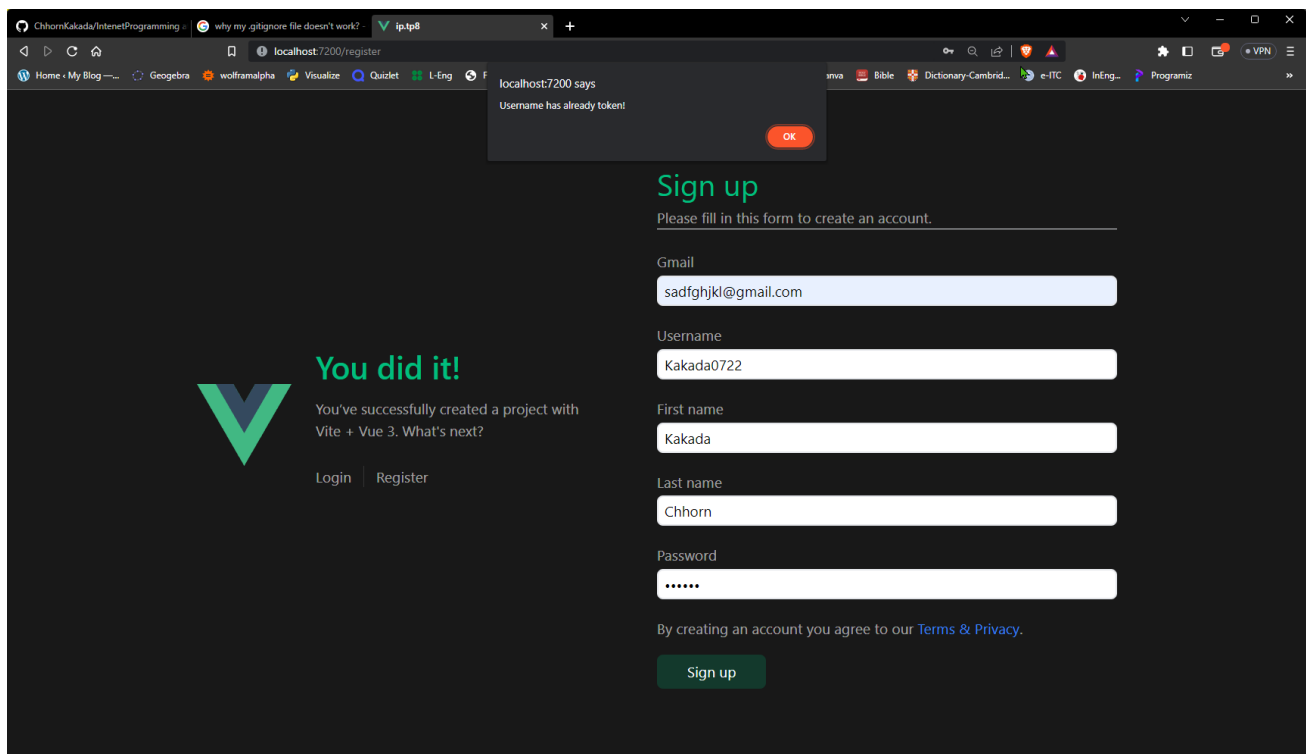

Cannot login because the Username or Password is incorrect.

Home page after Login Successfully.

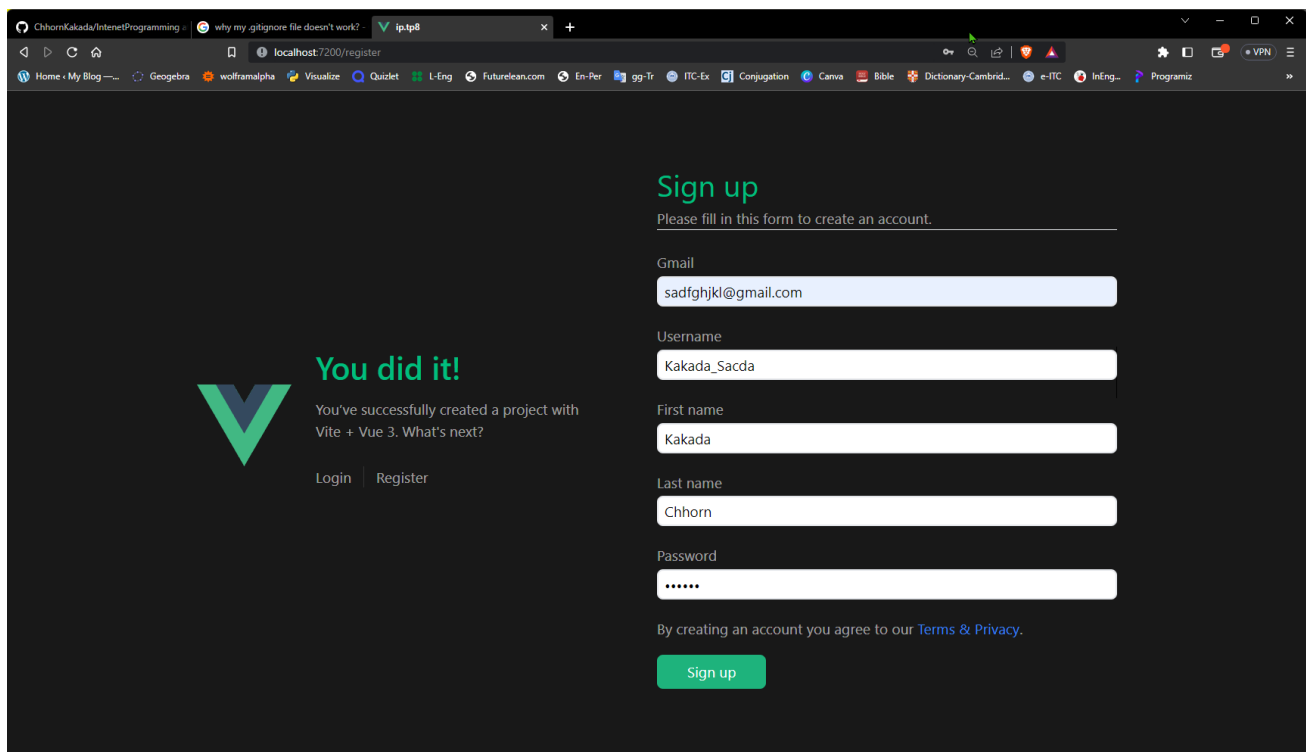

Cannot create account since the username has already token.

The screenshot shows a web browser window with the URL `localhost:7200/register`. On the left, there is a green 'V' logo and the text 'You did it! You've successfully created a project with Vite + Vue 3. What's next?' with links for 'Login' and 'Register'. On the right, there is a 'Sign up' form with the following fields: 'Gmail' (containing 'sdfghjkl@gmail.com'), 'Username' (containing 'Kakada0722'), 'First name' (containing 'Kakada'), 'Last name' (containing 'Chhorn'), and 'Password' (containing '*****'). A message box from 'localhost:7200' says 'Username has already token!' with an 'OK' button. Below the form, it says 'By creating an account you agree to our [Terms & Privacy](#).' and a 'Sign up' button.

The form before signs up.

This screenshot is identical to the previous one, but the 'Username' field now contains 'Kakada_Sacda' instead of 'Kakada0722'. The 'Gmail', 'First name', 'Last name', and 'Password' fields remain the same. The 'You did it!' message and the 'Sign up' button are also present.

Sign Up Successfully.
